

CAMP MAINTENANCE TECHNICIAN

Camp maintenance personnel are required to undertake tasks involving both skilled trade and maintenance tasks and more rudimentary maintenance/repair experience on camp and utility support services. Responsibilities include but are not limited to:

- Snow clearing of steps, landings and footpaths on a priority basis while supervising/monitoring/providing guidance to 3rd party snow clearing and as required.
- General repair to camp structure interior structure finishing and exterior building envelope and skirting.
- Review and address daily maintenance tasks compiled by camp management.
- Inspect on a regular basis essential camp structure systems such as HVAC, Water, Sewage, LPG and Fire.
- Suppression, making recommendations for upgrades and addressing immediate operational concerns with each system.
- Record and report on-site inventory levels of consumables such as fuel/LPG and potable water.
- Sort recyclable refuse and deposit into appropriate receptacles for off-site transport.
- Provide and maintain on-site for Terra's exclusive use, one 4x4 truck.
- Collect potable water samples and analyze for free chlorine concentration, record the results and provide to camp management.
- Perform routine camp electric generator maintenance and switchover. Report any and all camp generator operational issues to camp manager, and follow up on generator repairs with 3rd party supplier.
- Identify and manage all camp infrastructure tasks that require skill-certified 3rd party trades such as electricians and refrigeration techs.
- Maintain inventory levels of all maintenance and service parts/specialized tools required to ensure camp structures and support equipment is in full working order.
- Possess and maintain in good standing all required safety and specialized training certificates required by Terra's and the client's HSE programs and specific to the project site.
